

THIS IS YOUR CHANCE TO DRIVE CHANGE IN MONTANA'S FOOD SYSTEM!

In 1950, 70% of Montanans' food was grown here.

Today, it's only 3%.

Importing 97% of our food is unsustainable and sends \$5 billion in food dollars out of state each year. The *33x33 for Montana* Initiative aims to increase the percentage of Montana food purchased by Montanans from 3% to 33% by 2033, strengthening Montana's supply chain, economy, and public health.

YOU can help shape the roadmap to achieve 33% by 2033.
Join a meeting near you and share your thoughts on:

- *In your community, what's working well for producing, buying or selling Montana food in-state?*
- *What successes could be replicated statewide?*
- *What barriers limit your access to buying or selling Montana food in-state?*
- *What ideas can strengthen our Montana supply chain?*

RSVP today! Walk-ins welcome.

BONUS: Attendees have a chance to win a \$50 gift card!
